Research Experience

NC State Undergraduate Research Assistant (2017-2018)

National Institute on Drug Abuse: The NIDA Project examines methods of intervention in parolees

- Analyzed trends in criminal behavior, specifically looking at recidivism rates among drug abusers and parolees North Carolina Police Training Project
- Conducted and coded police interviews regarding overall training and training specifically focusing on Domestic Violence or Intimate Partner Violence.
- Examined trends and outliers in types of police training across the different counties in North Carolina

Wake County Jail Database: examines mental health indicators for North Carolina prisoners and parolees in Wake County to assess appropriate rehabilitation and implementation of treatment

- Conducted a personal research project examining sexual violence recidivism rates in relation to the presence of mental health indicators for both juvenile and adult offenders. A regression analysis revealed that sexual offenders without mental health indicators recidivate more than those presence with of mental health indicators.
